RECYCLEYE

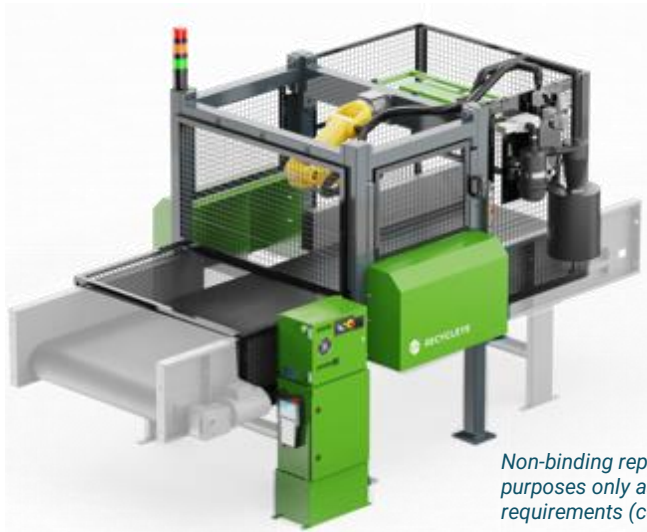

B - Scope of Supply

Included in this quotation.

1 - Equipment

1 x Recycleye QualiBot® robotic sorting unit(s). Easily retrofittable to existing conveyor belts thanks to its reduced footprint, it is designed for optimising quality control and reducing operational costs in waste management facilities. Built in the UK to CE certification standards, it includes:

- A.I. detection system
Recycleye CogniScan® vision system
- Extraction system
FANUC robotic arm (FANUC is a world leading manufacturer of robotic arms) fitted with Recycleye proprietary vacuum extraction system.

Non-binding representation of a single unit for illustration purposes only as design is subject to change based on site requirements (conveyor not included).

2 - Services

- Pre-installation
Technical delegation to prepare detailed design (measurements) and fit a temporary Data Acquisition Device (DAQ) with the following personnel over a period of 1 day:
 - 1 Lead engineer
 - 1 Technician

The abovementioned delegation is based on the site being ready to connect the DAQ to electrical power and Internet in accordance with the instructions given by Recycleye.
- Installation
Installation and commissioning of the equipment listed above with the following personnel over a period of up to **X** days:
 - 1 Lead engineer
 - 1 Controls engineer
 - 2 Technicians

Including

 - Salaries based on 45-man hours per week from Monday to Friday
 - All travel, lodging and boarding costs

The abovementioned delegation is based on the supplied equipment being connected to compressed air, electrical power and Internet in accordance with the instructions given by Recycleye.

3 – Yearly subscription package

Our comprehensive subscription package ensures the continual and optimal functioning of the system while providing enhanced visibility on the line activity through data analytics. It consists of:

- Consumables
Yearly supply of wear parts (suction cups, level compensators, vacuum sensors, drum air filter, hose)
- Maintenance visits
 - 3 x 1-day on-site maintenance visit (1 of 3 for the robot performed by a certified FANUC engineer)
 - 1 x 1-day emergency site visit
- Remote monitoring
Remote assistance and monitoring (up to 20 h/y) assisted by IP cam
- Software updates
- Data analytics
Access to Recycleye online dashboard providing trends on the compositional analysis of the line(s) and monitoring the unit(s) performance.
 - Accessible anywhere
 - Customisable time range analysis (per hour, per shift, per week, per month)
 - Exports to Excel available for detailed analysis
